FEATURE GUIDE · WHAT'S NEW · OCTOBER 2026

Conversion, data and five AI agents.

Twelve new features: what each one does, what it does on its own, and how to show it live in two minutes. Most of them are in the ₹1,999 AI Advantage Membership.

Conversion	Find the leak, follow up every inquiry
Data	Expenses, bank, GST, customers, getting paid
AI agents	Five that work on a schedule, for you to approve

WHO IT'S FOR

Business owners on the Membership and higher plans, the speakers who demo it, and the team that supports members.

THE SCREENS

Taken from the launch demo account (Kaveri Home Appliances, an invented business, with invented customers and an invented bank statement).

Twelve new features, and where they sit.

Nine of the twelve are in the ₹1,999 Membership. Win-Back and company research are in the Action Program; Lead Response, which replies from the owner's own WhatsApp number, is in Growth Mentorship. Higher plans include everything below them.

Conversion	Funnel leak finder	CV-03	MEMBERSHIP ₹1,999
	Follow-ups on day 1, 3 and 7	CV-04	MEMBERSHIP ₹1,999
Data	Expense tracker	DT-04	MEMBERSHIP ₹1,999
	Bank statement reader	DT-05	MEMBERSHIP ₹1,999
	GST set-aside	DT-06	MEMBERSHIP ₹1,999
	Customer risk	DT-07	MEMBERSHIP ₹1,999
	Getting paid	DT-08	MEMBERSHIP ₹1,999
AI agents	Competitor Watch	AG-01	MEMBERSHIP ₹1,999
	Reviews & reputation	AG-02	MEMBERSHIP ₹1,999
	Win-Back	AG-03	ACTION PROGRAM
	Content & company research	AG-04	ACTION PROGRAM
	Lead Response	AG-05	GROWTH MENTORSHIP

TURNING IT ON FOR MEMBERS

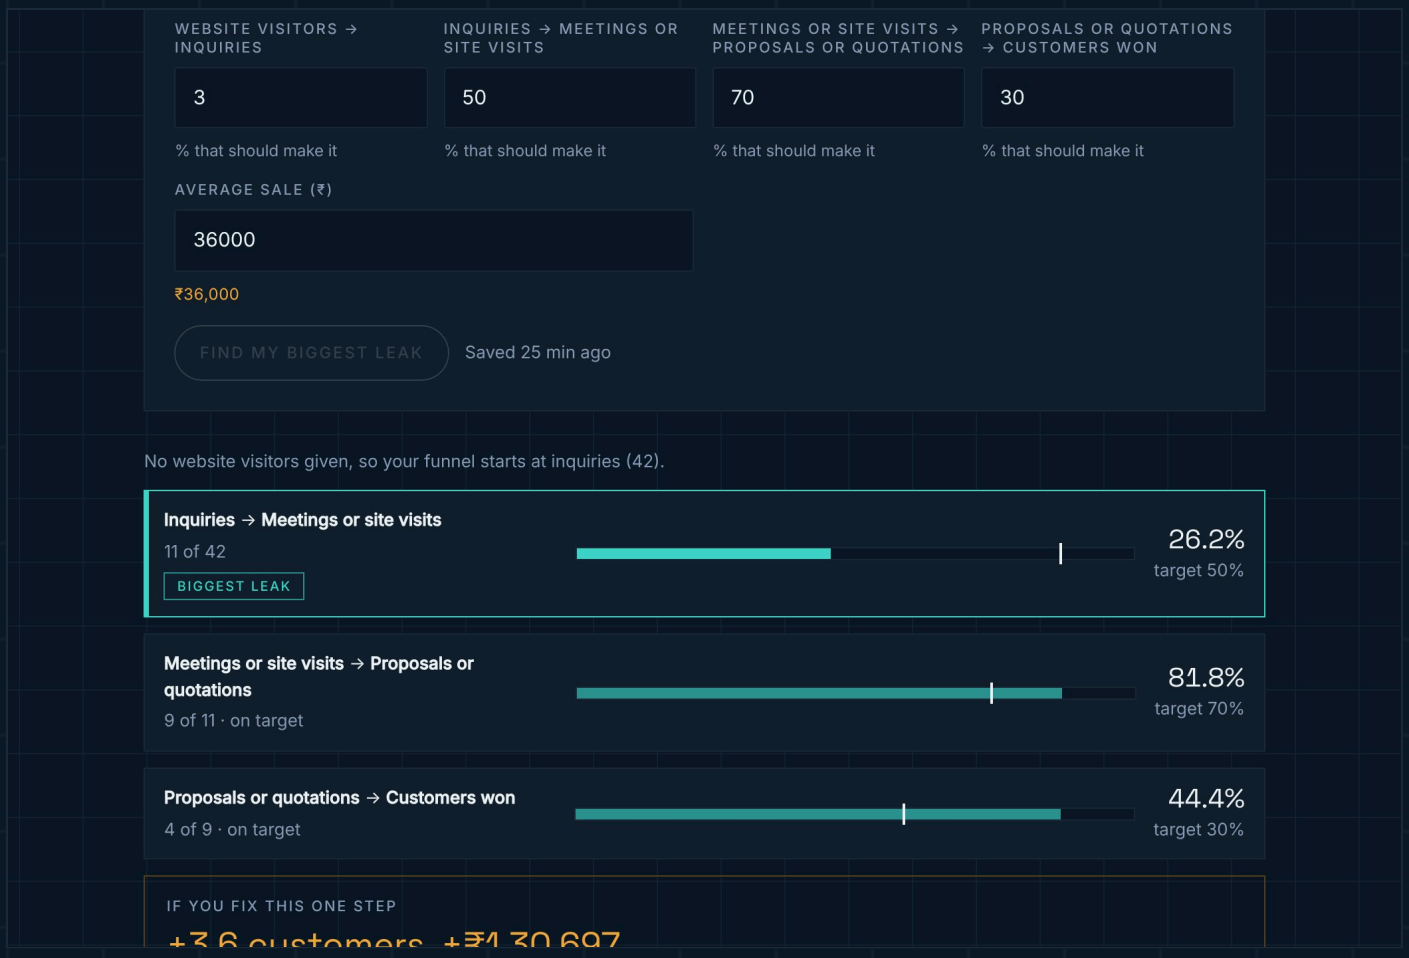

The funnel leak finder and follow-ups sit in the Action Program in the code. The admin moves them into the Membership with one tap: Admin → Live event → **Move them into Membership**. The same tap moves the Send list, and the v2.1 guide's features if they weren't moved yet.

AI RUNS

Only some of this uses the AI: a follow-up, a leak's fixes, a reply to a review, a week's Win-Back messages, a competitor summary when something changed, post ideas and a research plan — 1 run each. Expenses, the bank statement, GST, customer risk and getting paid use none.

Find the one step where most customers slip away.

Type last month's numbers — website visitors, inquiries, meetings or site visits, proposals, customers won. The hub finds the step furthest below its target and shows what fixing only that step is worth, in rupees.

HOW IT WORKS

1. Type one period's numbers, or press **Use my hub numbers** to fill them from the last 30 days in the hub.
2. Don't know your website visitors? Leave it at 0: the funnel starts at inquiries.
3. See each step against its target, the biggest leak, and what fixing just that step adds — from the same inquiries.

SHOW IT LIVE

1. Ask the room for last month's inquiries, meetings, proposals and customers won.
2. Type them with visitors at 0 and press **Find my biggest leak**.
3. Read the leak and the rupees, then press **Get fixes**.

WHAT RUNS ON ITS OWN

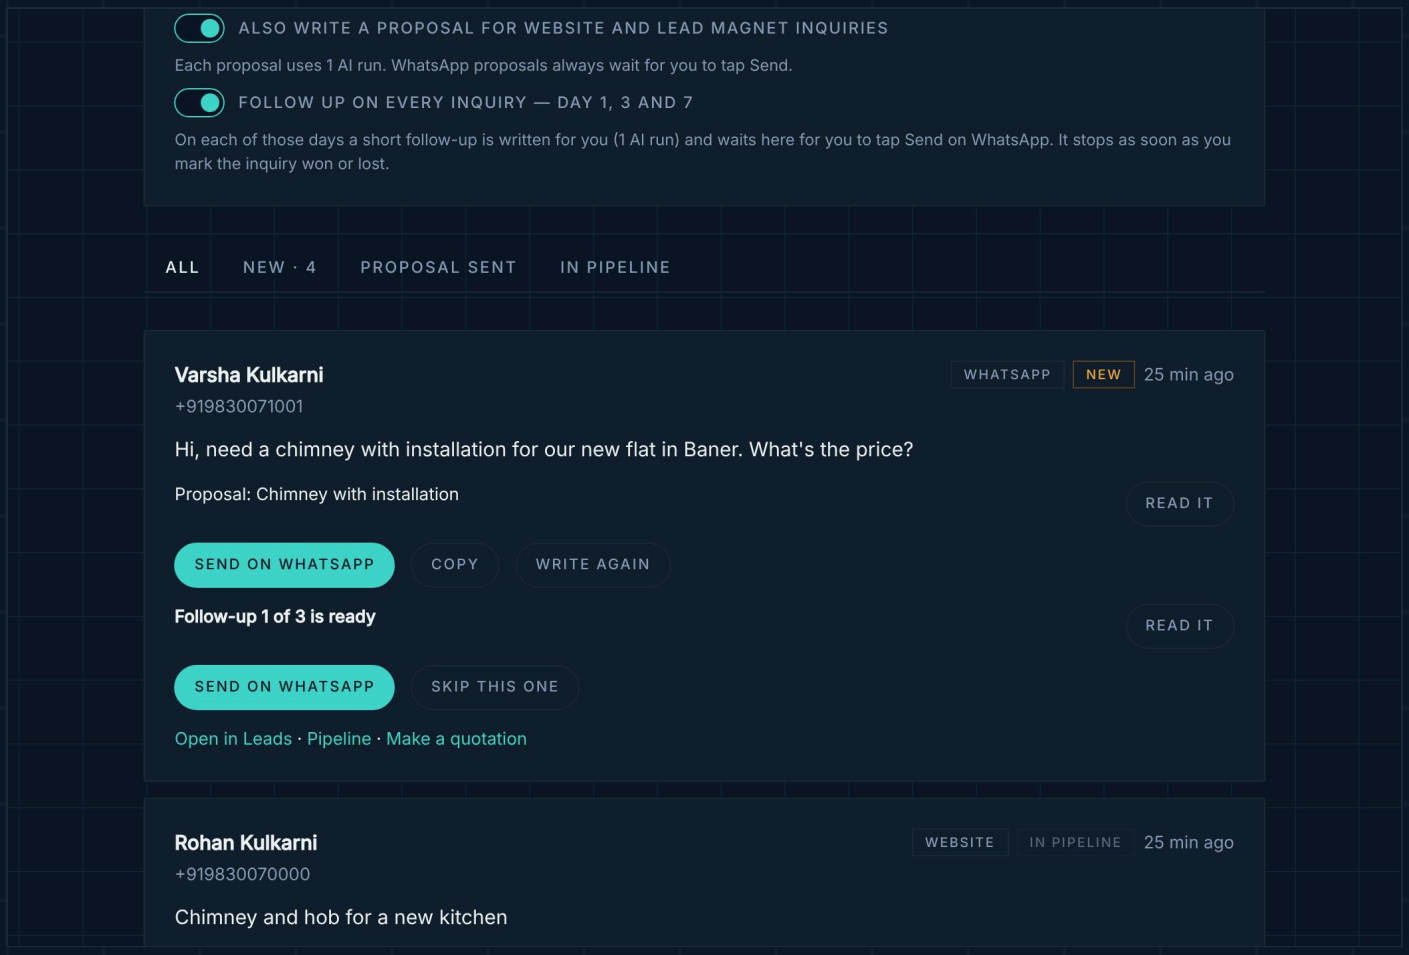

- The maths is done by the hub, never the AI.
- A step nothing came into isn't judged — all-zero numbers show no leak.
- **Get fixes**: three to five actions for that step, written for your business (1 AI run).

GOOD TO KNOW

- Targets start at 3% of visitors becoming inquiries, then 50%, 70% and 30% — change them to your own.
- At the event, the speaker screen counts how many in the room found their biggest leak.

Every inquiry followed up on day 1, 3 and 7.

Most sales are lost because nobody followed up. Switch follow-ups on and every new inquiry gets three short, polite follow-ups — each written when it falls due, waiting on the Inquiries page for one tap.

HOW IT WORKS

1. On Inquiries, switch on **Follow up on every inquiry**. On the Membership it stays off until you switch it on yourself.
2. On day 1, 3 and 7 after an inquiry, in working hours (10am to 7pm), a follow-up is written from your Knowledge Hub.
3. It waits on that inquiry: **Send on WhatsApp** opens your own WhatsApp with the text typed; **Skip this one** drops it.

SHOW IT LIVE

1. Day 1: swap with your neighbour — send an inquiry from their phone to your website.
2. Day 2: open Inquiries. Follow-up 1 of 3 is waiting.
3. Tap **Send on WhatsApp**. The speaker screen counts follow-ups ready and sent.

WHAT RUNS ON ITS OWN

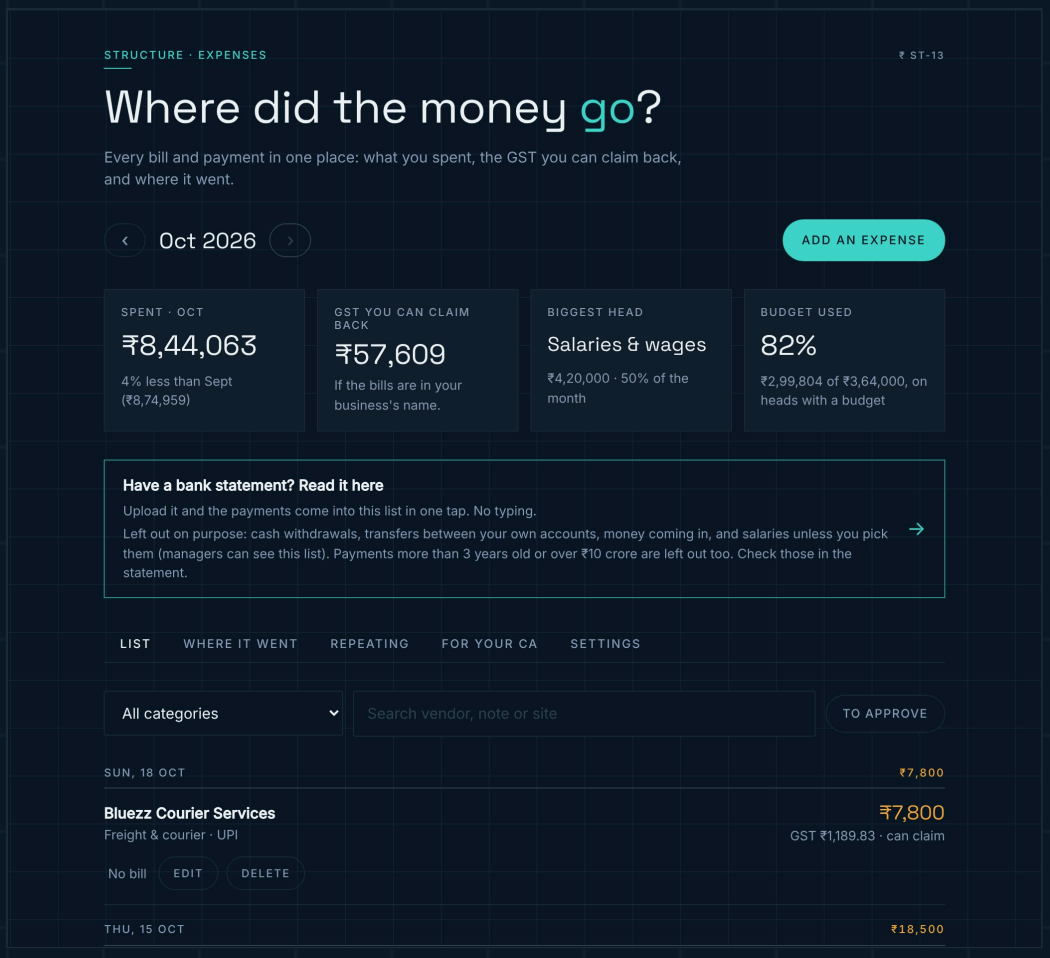

- Website, lead magnet, email and pasted WhatsApp inquiries all get them.
- They stop the moment you mark the inquiry won or lost.
- Each one also waits in your Send list.

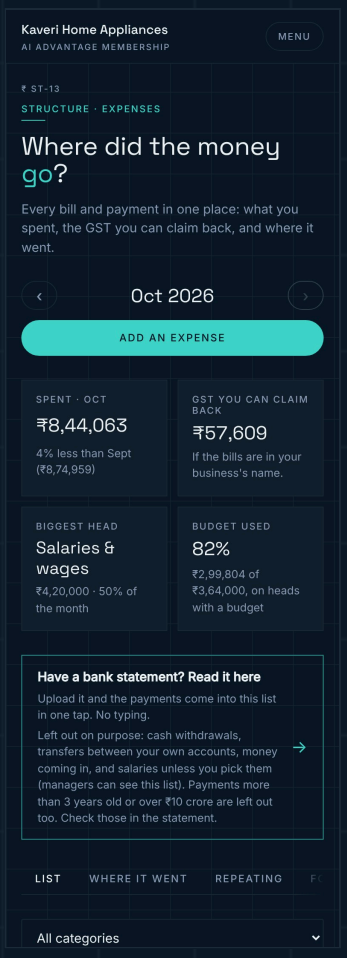

GOOD TO KNOW

- Each follow-up is 1 AI run. Nothing goes to a customer without your tap.
- A price only if it's in your Knowledge Hub — as everywhere in the hub.
- Accounts made at the live event start with follow-ups on; switch them off any time.

Every bill, the GST you can claim, and where the money went.

Add an expense in seconds, with a photo or PDF of the bill. The categories fit your kind of business — stock purchases and godown for a trader, raw material and job work for a factory, site material and labour for interiors.

HOW IT WORKS

1. Add an expense: date, amount, vendor, category, how it was paid, the GST on the bill and whether you can claim it back.
2. Attach the bill (PDF, JPG or PNG). A staff member's entry waits for a manager to approve it.
3. See the month: spent, GST you can claim back, the biggest head and budget used — and where it went, head by head.

SHOW IT LIVE

1. Add today's electricity bill with a photo of it.
2. Open **Where it went**: the month by head, against budget.
3. Press **Download for your CA (CSV)**.

WHAT RUNS ON ITS OWN

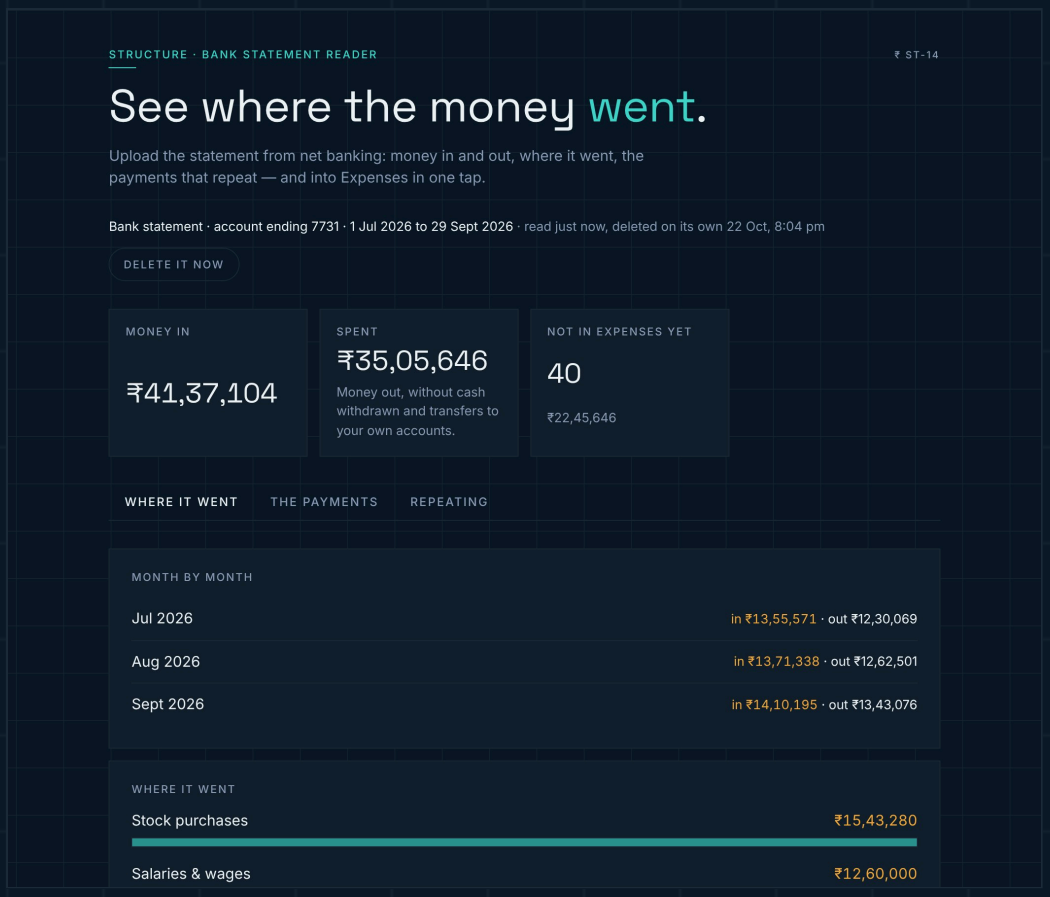

- Categories are picked from your Knowledge Hub's industry; add up to 10 of your own.
- Set a monthly budget per head: the page shows which are over.
- A payment that repeats (rent, an EMI) can be counted in Cash flow every month.

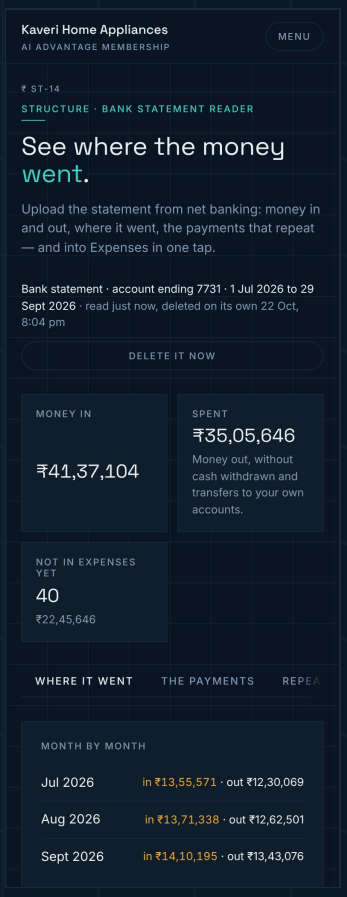

GOOD TO KNOW

- No AI run.
- Staff add their own entries; managers and the owner see everything and approve.
- The CA's file has one row per bill: vendor, GSTIN, category, amount, GST, whether it can be claimed, and whether the bill is attached.

Upload the bank statement. See where the money went.

Download the statement from net banking — Excel, CSV or PDF, password-protected too. In seconds: money in and out, where it went by category, who you paid the most, and the payments that repeat every month.

HOW IT WORKS

1. Upload the file (up to 10 MB). For a PDF with a password, type it — it's used once to open the file and never kept.
2. Check the categories. Change one and tick **use it for this payee every time**.
3. **Add all to Expenses** in one tap; add a repeating payment to Cash flow.

SHOW IT LIVE

1. Upload the demo statement (three months, all invented).
2. Show **Where it went**, then **Repeating**: rent on the 5th, the van EMI on the 10th.
3. Press **Add all to Expenses**, then open Expenses.

WHAT RUNS ON ITS OWN

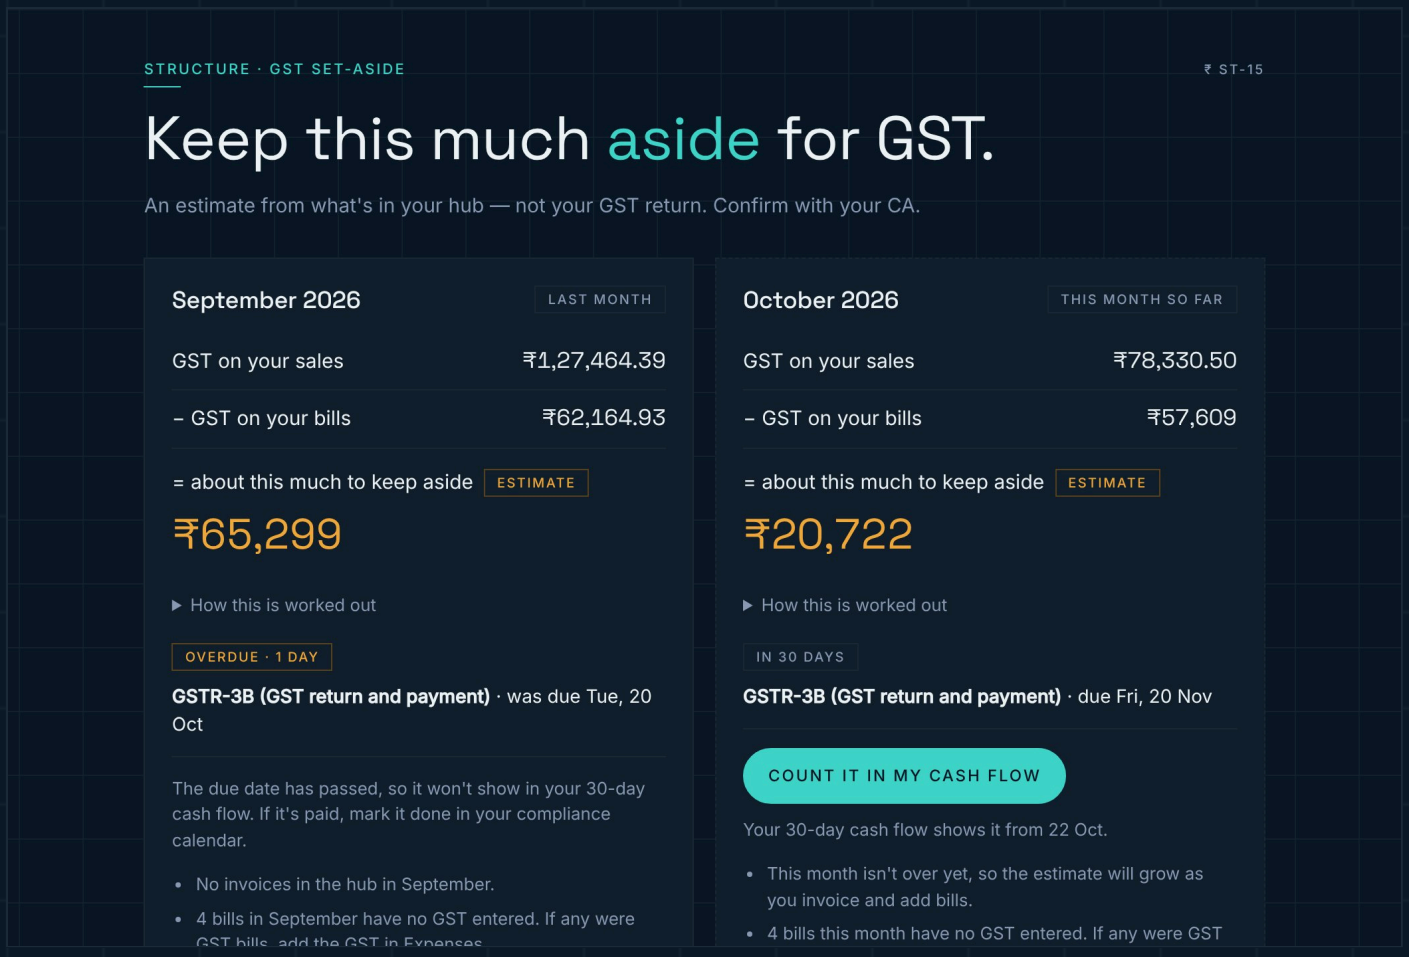

- Long numbers, e-mail addresses and UPI IDs are hidden before anything is kept.
- The file is never stored. The list is deleted after 24 hours — or at once with **Delete it now**.
- Cash withdrawn and money moved to your own accounts aren't counted as spending.

GOOD TO KNOW

- Owner only. No AI reads it and nothing leaves the hub.
- Salary payments go into Expenses only when you tick them — managers can see Expenses.
- A row whose statement doesn't say money in or out is marked **Check** and added only if you pick it.
- The same payment read twice is added once.

Know how much to keep aside for GST.

GST on your sales minus the GST on your bills — about what the next GST payment will be, for last month and for this month so far. An estimate from what's in the hub, not your GST return.

STRUCTURE · GST SET-ASIDE ₹ ST-15

Keep this much aside for GST.

An estimate from what's in your hub — not your GST return. Confirm with your CA.

September 2026 — LAST MONTH

GST on your sales	₹1,27,464.39
− GST on your bills	₹62,164.93

= about this much to keep aside ESTIMATE

₹65,299

▶ How this is worked out

OVERDUE · 1 DAY

GSTR-3B (GST return and payment) · was due Tue, 20 Oct

The due date has passed, so it won't show in your 30-day cash flow. If it's paid, mark it done in your compliance calendar.

- No invoices in the hub in September.
- 4 bills in September have no GST entered. If any were GST bills, add the GST in Expenses

October 2026 — THIS MONTH SO FAR

GST on your sales	₹78,330.50
− GST on your bills	₹57,609

= about this much to keep aside ESTIMATE

₹20,722

▶ How this is worked out

IN 30 DAYS

GSTR-3B (GST return and payment) · due Fri, 20 Nov

COUNT IT IN MY CASH FLOW

Your 30-day cash flow shows it from 22 Oct.

- This month isn't over yet, so the estimate will grow as you invoice and add bills.
- 4 bills this month have no GST entered. If any were GST

HOW IT WORKS

1. GST on sales: your hub invoices (Razorpay ones too), less credit notes, plus an uploaded sales sheet with a GST column.
2. GST on bills: approved expenses marked as claimable.
3. See the amount to keep aside and the due date from your compliance calendar.

WHAT RUNS ON ITS OWN

- **Count it in my cash flow**: the estimate becomes the amount on that GST item, so Cash flow plans for it.
- A number you typed in the compliance calendar is yours — replaced only if you press **Replace it**.
- If the bills' GST is bigger, the difference isn't taken off next month: keeping more aside is the safer mistake.

SHOW IT LIVE

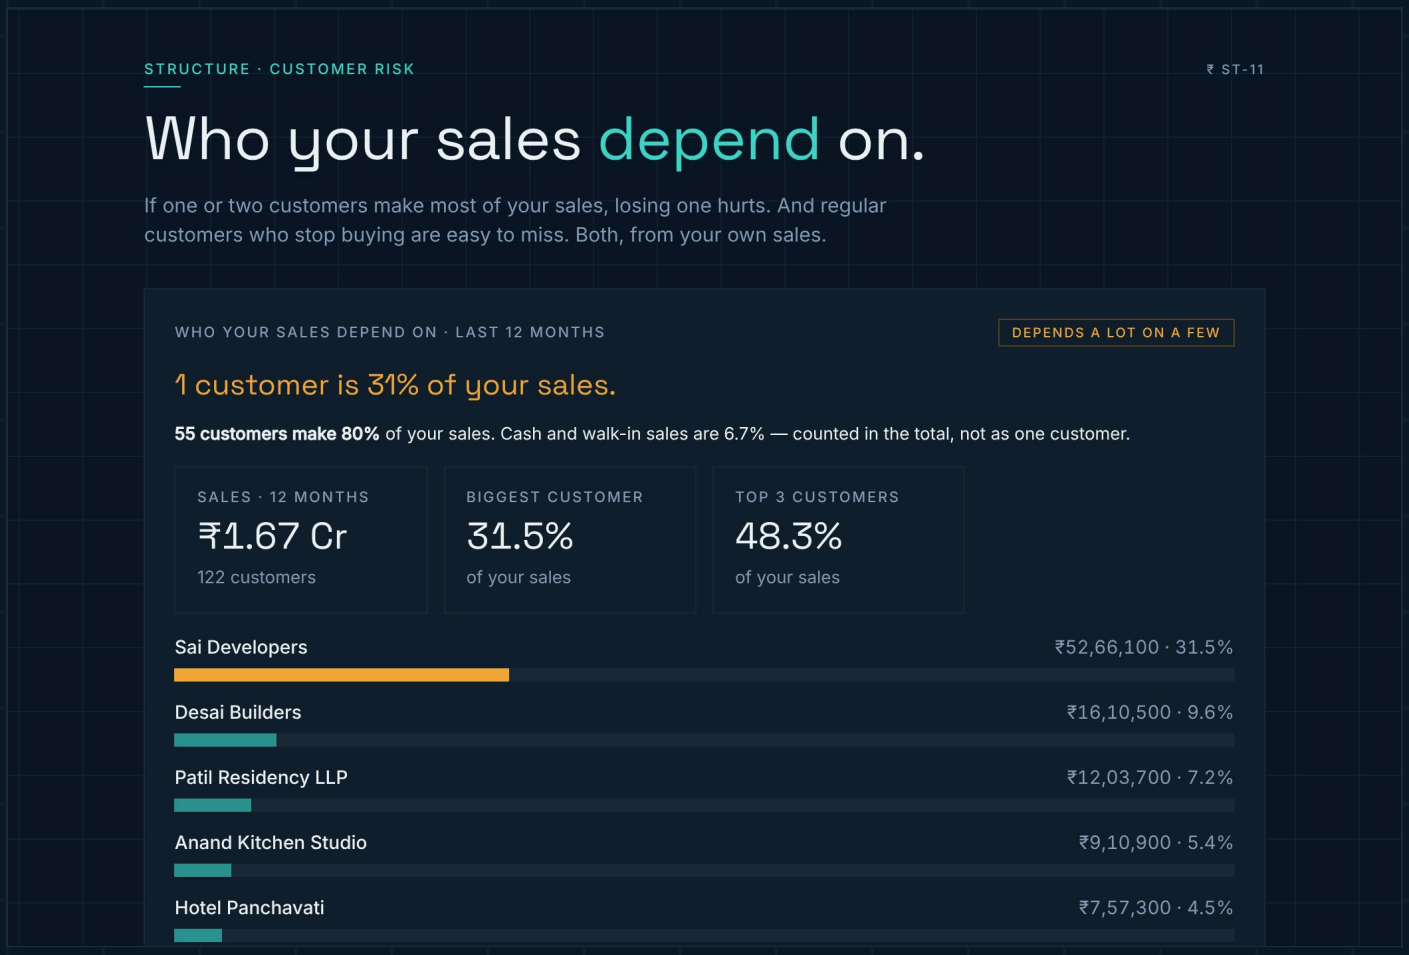

1. Open GST set-aside: last month's estimate and its due date.
2. Open **How this is worked out**.
3. Press **Count it in my cash flow**, then open Cash flow.

GOOD TO KNOW

- Not a GST return and not tax advice — confirm with your CA.
- Due dates come from the rules table, never the AI.
- A sale already in the hub (same invoice number and year, same customer or amount) is counted once. No AI run.

Who your sales depend on.

If one or two customers make most of your sales, losing one hurts. And regular customers who stop buying are easy to miss. Both, from your own sales.

HOW IT WORKS

1. Upload a year of sales from Tally or Excel — or use the invoices already in the hub.
2. See each customer's share of the last 12 months, the biggest customer and the top three.
3. **Gone quiet**: regular customers well past their usual gap between purchases, biggest first.

WHAT RUNS ON ITS OWN

- A Tally sales register is read as it is: the header row is found and credit notes come off.
- Cash and walk-in sales count in the total, not as one customer.
- **Check in on WhatsApp** opens your own WhatsApp with a short hello typed.

SHOW IT LIVE

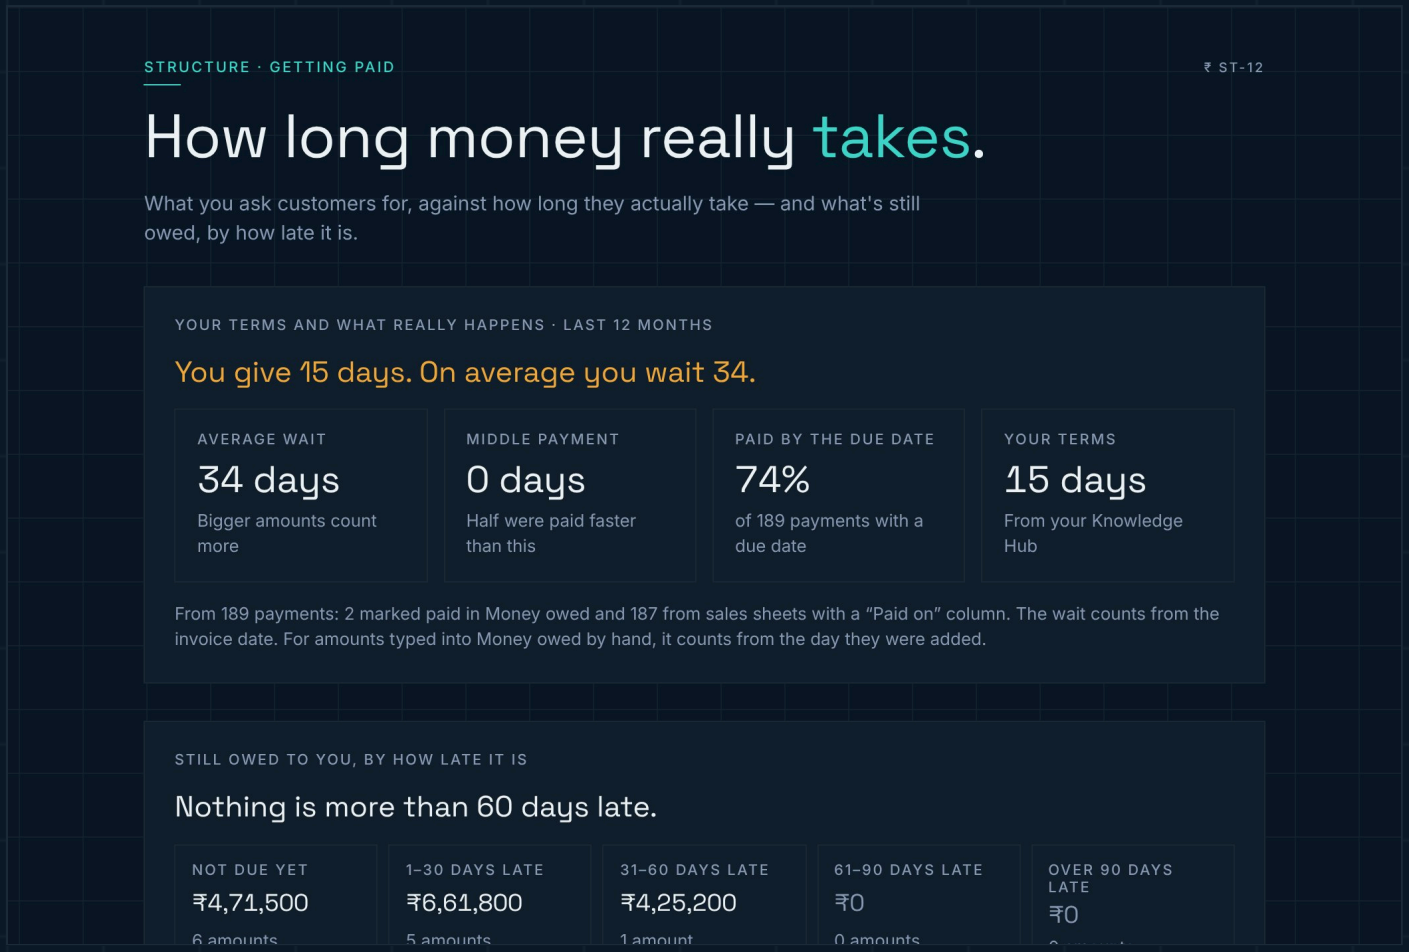

1. Upload the demo sales sheet.
2. Read the top line out: how much of the sales the biggest customer is.
3. Open Gone quiet and tap **Check in on WhatsApp** on one.

GOOD TO KNOW

- Read-only: nothing is sent and no money owed changes.
- Quiet means three or more purchases, and more than twice the usual gap (at least 45 days) since the last.
- No AI run. An upload can be undone.

How long money really takes.

What you ask customers for, against how long they actually take to pay — and what's still owed, by how late it is.

STRUCTURE · GETTING PAID ₹ ST-12

How long money really takes.

What you ask customers for, against how long they actually take — and what's still owed, by how late it is.

YOUR TERMS AND WHAT REALLY HAPPENS · LAST 12 MONTHS

You give 15 days. On average you wait 34.

AVERAGE WAIT	MIDDLE PAYMENT	PAID BY THE DUE DATE	YOUR TERMS
34 days	0 days	74%	15 days
Bigger amounts count more	Half were paid faster than this	of 189 payments with a due date	From your Knowledge Hub

From 189 payments: 2 marked paid in Money owed and 187 from sales sheets with a “Paid on” column. The wait counts from the invoice date. For amounts typed into Money owed by hand, it counts from the day they were added.

STILL OWED TO YOU, BY HOW LATE IT IS

Nothing is more than 60 days late.

NOT DUE YET	1–30 DAYS LATE	31–60 DAYS LATE	61–90 DAYS LATE	OVER 90 DAYS LATE
₹4,71,500	₹6,61,800	₹4,25,200	₹0	₹0
6 amounts	5 amounts	1 amount	0 amounts	

HOW IT WORKS

1. From money owed that was marked paid, and sales sheets with a Paid On column, the hub works out the real wait.
2. See your terms, the average and middle wait, and the share paid by the due date.
3. Still owed: not due yet, 1–30, 31–60, 61–90 and over 90 days late.

SHOW IT LIVE

1. Open Getting paid and read the top line: the days you give, and the days you really wait.
2. Show the late buckets.
3. Press **Chase these in Money owed**.

WHAT RUNS ON ITS OWN

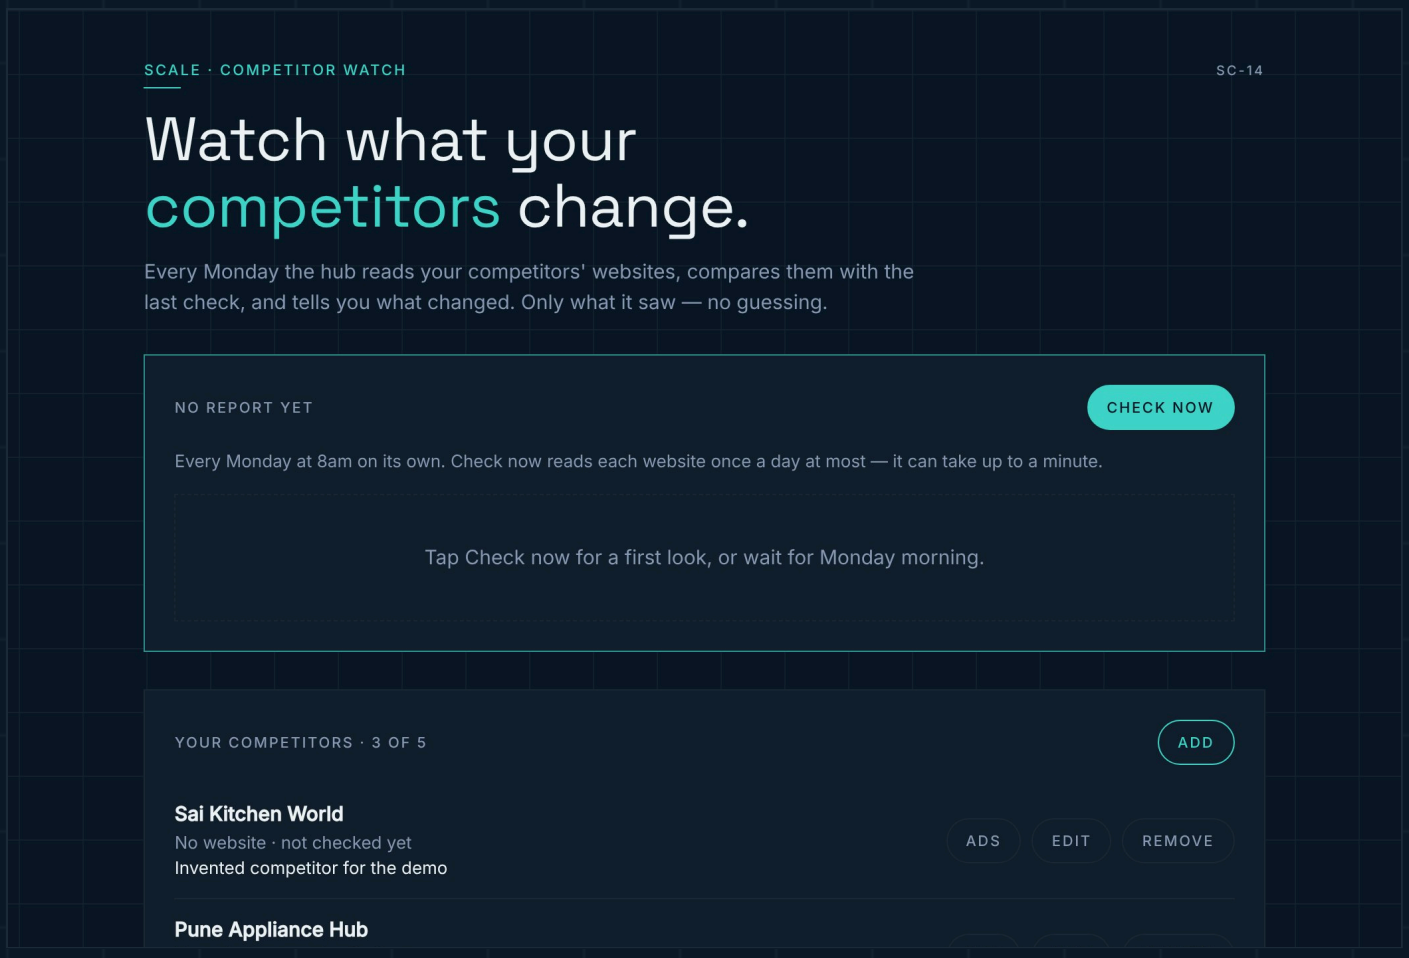

- Payers: who pays on time and who's late, by how much.
- The biggest amounts more than 30 days late come first.
- **Chase these in Money owed** opens the reminders.

GOOD TO KNOW

- Read-only, and no AI run.
- Rows from a sheet are aged as of the day you uploaded it; after 45 days the page asks for a fresh sheet.
- Your payment terms come from the Knowledge Hub.

Know what your competitors changed this week.

Add up to five competitors. Every Monday morning the hub reads their public websites, compares them with last week, and tells you only what changed — prices, offers, new products or pages.

HOW IT WORKS

1. Add a competitor: name and website; if you like, their Google listing and Facebook page name.
2. Monday, 8am: each website is read (at most 5 pages) and compared with the last check.
3. A report every Monday — when something changed, a short summary of what — and a WhatsApp alert to you.

SHOW IT LIVE

1. Add a competitor the room knows, with their website.
2. Press **Check now**: the first look is saved.
3. Open **See their running ads**.

WHAT RUNS ON ITS OWN

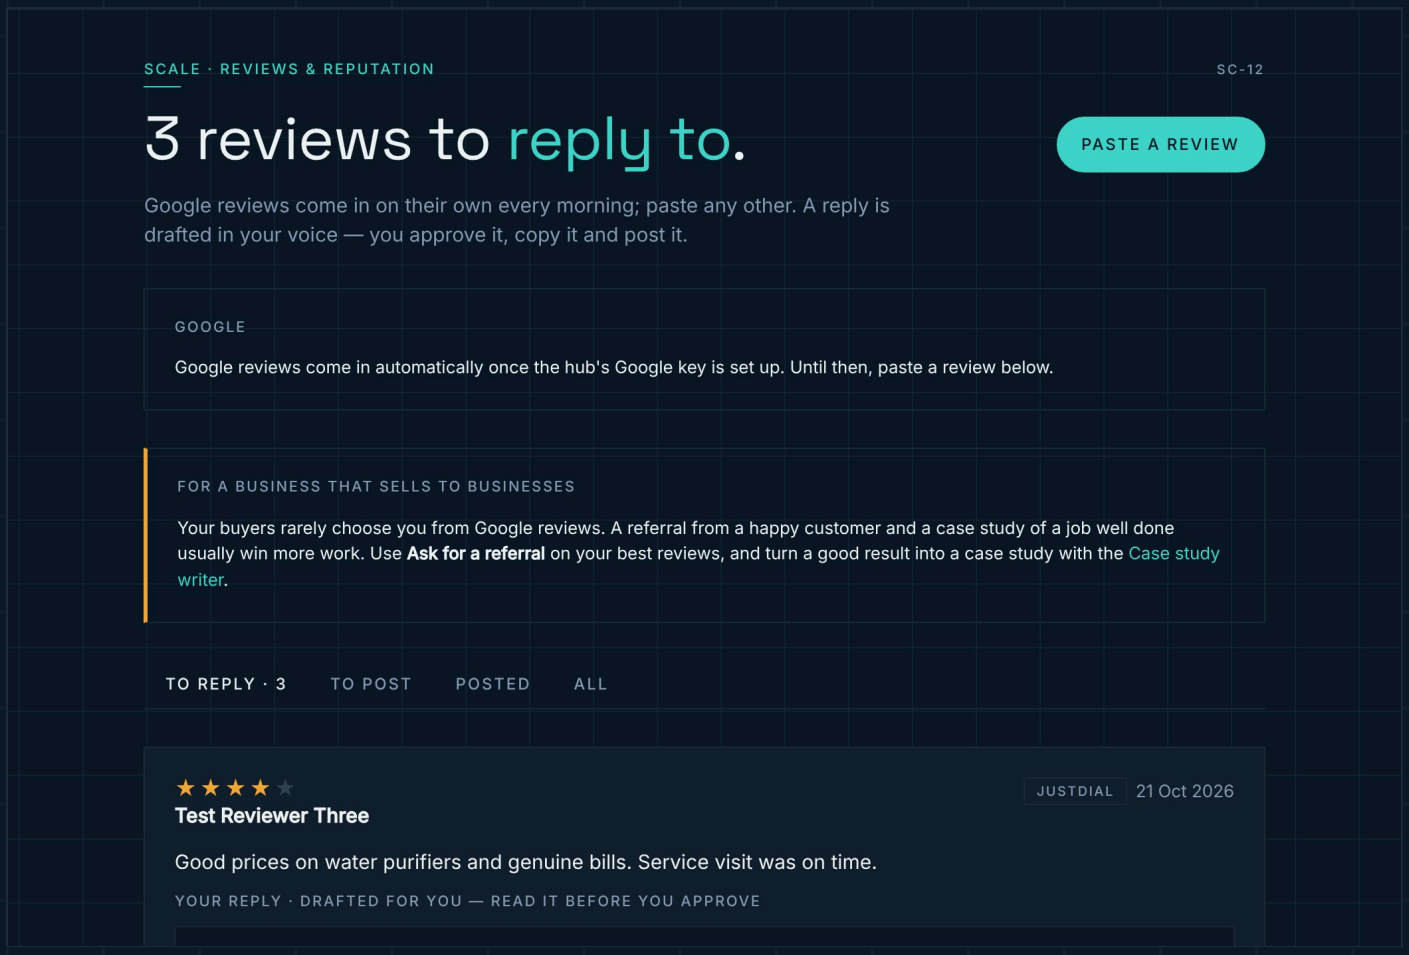

- **Check now**: once per competitor per day.
- Their Google rating and review count, once the hub's Google key is set up.
- **See their running ads** opens Meta's public Ad Library for their page.

GOOD TO KNOW

- Public pages only, following each site's robots.txt; never Instagram, Facebook or LinkedIn.
- The summary says only what the hub saw change — no guessing. 1 AI run, only when something changed.
- Google's rating and count are cleared after 30 days at most.

Every review gets a reply — in your voice.

Google reviews come in every morning once the hub's Google key is set up; paste any other — Facebook, Justdial, IndiaMART, Practo. A reply is drafted at once. You approve it, copy it and post it.

HOW IT WORKS

1. Connect your Google listing (**Find my business**), or paste a review.
2. Read the drafted reply. Edit it, or draft again, then **Approve**.
3. Copy it, press **Open Google**, post it, and press **I've posted it**.

WHAT RUNS ON ITS OWN

- Every morning at 9:30: new Google reviews, the rating and count, and a draft for each (up to 5 a day).
- A happy customer: **Ask for a referral** — a WhatsApp message you tap to send.
- Review requests ask for honest feedback, with nothing offered in return.

SHOW IT LIVE

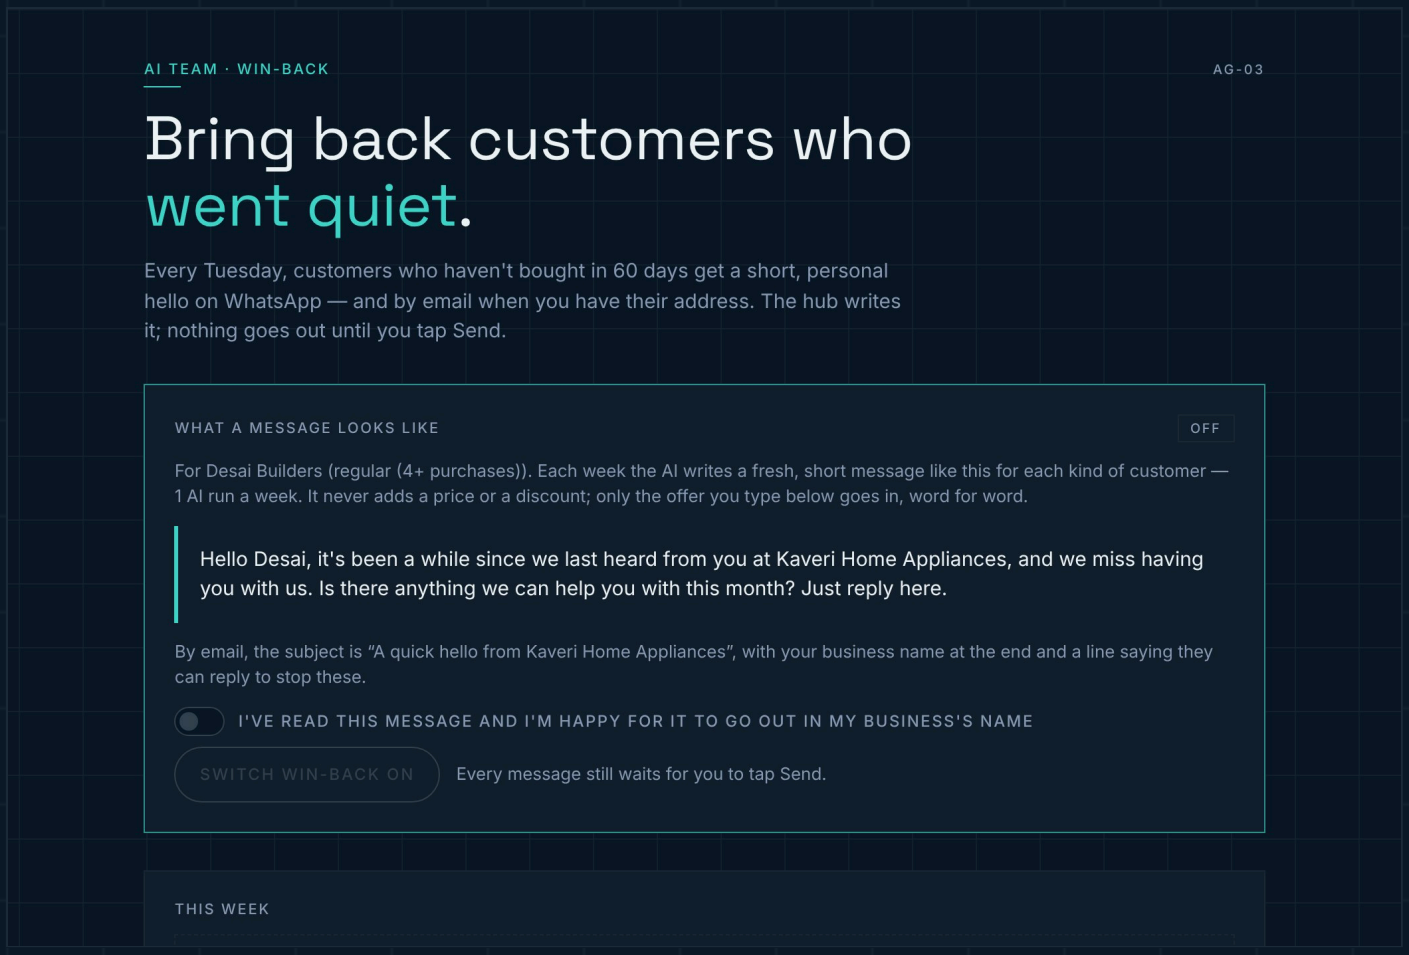

1. Paste a 2-star review on stage.
2. Read the calm, specific draft and approve it.
3. Paste a 5-star review and show **Ask for a referral**.

GOOD TO KNOW

- The hub never posts for you and never writes a review.
- Google shares only its 5 "most relevant" reviews; their words and stars are cleared after 30 days at most.
- Each draft is 1 AI run. For businesses that sell to businesses, the page suggests referrals and case studies.

Bring back customers who went quiet.

Every Tuesday, customers who haven't bought in 60 days (you choose 45 to 120) get a short, personal hello on WhatsApp — and by e-mail when you have their address. Written for you; nothing goes out until you tap Send.

HOW IT WORKS

1. Customers come from your sales: hub invoices, Razorpay, an uploaded Tally or Excel sheet, and your Customers list.
2. Choose how long is quiet, at least 1 or 2 purchases, how many a week (up to 40), and your own offer, if any.
3. Read the sample message, tick that you're happy for it to go in your business's name, and press **Switch Win-Back on**.

SHOW IT LIVE

1. Open Win-Back and read the sample for a regular customer.
2. Switch it on and press **Run now**.
3. Tap **Send on WhatsApp** for one customer.

WHAT RUNS ON ITS OWN

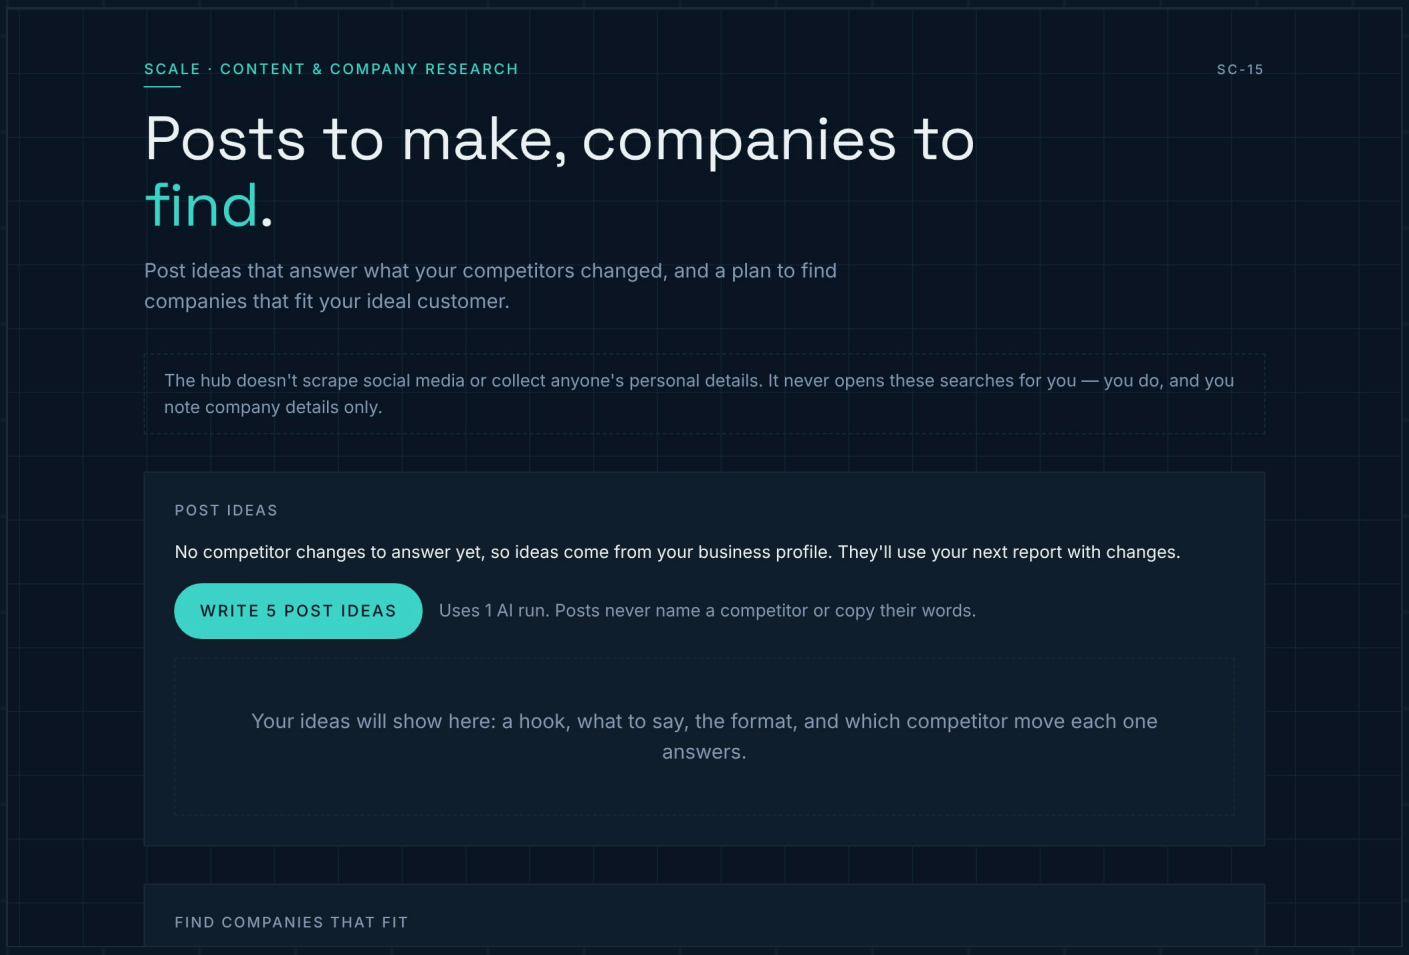

- Tuesday, 11am: the week's messages wait in your Send list, biggest spenders first.
- Never someone who bought recently, was contacted in the last 30 days, or got a Win-Back message in the last 90.
- **What it brought back**: customers messaged, who bought again, and what they spent.

GOOD TO KNOW

- One AI run a week writes the messages; the hub adds each first name, and your offer exactly as you typed it.
- Never a price or discount you didn't type.
- Messages not sent within 14 days expire.

Posts to make, companies to find.

Post ideas that answer what your competitors changed this week — and a plan to find the companies that buy what you sell.

HOW IT WORKS

1. **Write 5 post ideas**: a hook, what to say, the format, and the competitor move it answers.
2. Find companies that fit: describe who buys from you, and the city.
3. **Make my research plan**: kinds of companies, filters, questions to qualify them, search links to open — and a CSV template to fill.

SHOW IT LIVE

1. Press **Write 5 post ideas**.
2. Type "restaurants and cloud kitchens", "Pune", and press **Make my research plan**.
3. Open one search link.

WHAT RUNS ON ITS OWN

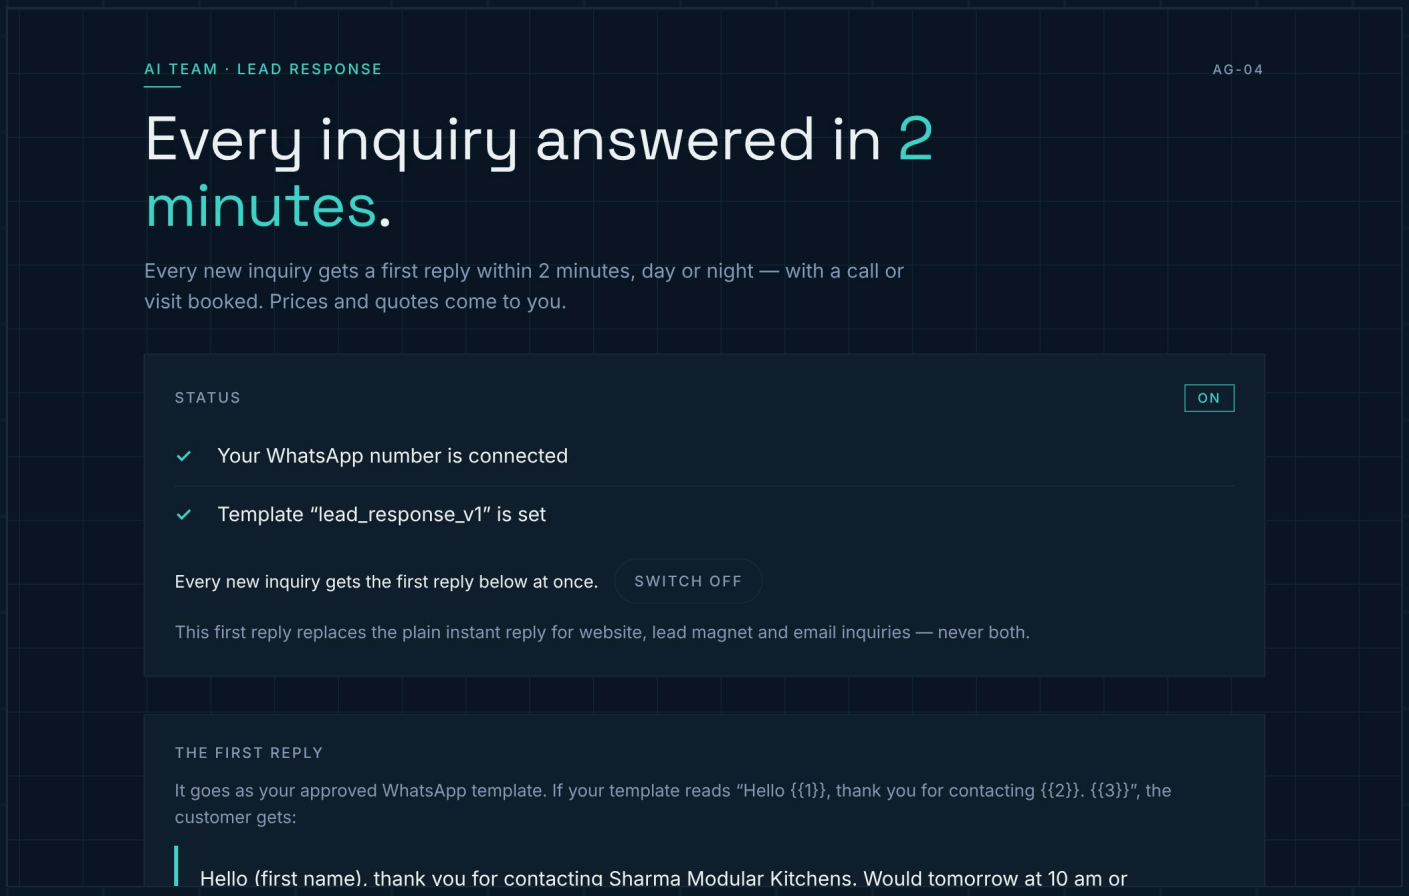

- Ideas come from the latest Competitor Watch report; without one, from your business profile — and the page says so.
- Posts never name a competitor or copy their words.
- Search links are built by the hub, not the AI.

GOOD TO KNOW

- The hub doesn't scrape social media or collect anyone's personal details, and never runs the searches for you.
- Each uses 1 AI run.

Every inquiry answered within minutes.

Every new inquiry gets a first reply within seconds, day or night, from your own WhatsApp number — with a call or a visit to book. Prices and quotes always go to a person.

HOW IT WORKS

1. Choose how to book — **Offer two times** or **Send my calendar link** — what to book (a free site visit, say) and your hours.
2. Read the exact first reply, press **Send it to my WhatsApp** to test it, then **Switch Lead Response on**.
3. Website, lead magnet and e-mail inquiries get it at once; the customer's answer lands in WhatsApp chats for a person to confirm.

SHOW IT LIVE

1. Fill the website form on a phone.
2. Show the WhatsApp reply arriving, with two times to choose from.
3. Show the last 30 days: replies sent and how fast.

WHAT RUNS ON ITS OWN

- It replaces the plain instant reply for that inquiry — one first reply, never two.
- If it can't go (number not connected, template missing), you're told why, and nothing else is sent.
- With **prices to a person** on, the WhatsApp AI never shares a price or negotiates; it hands the chat over.

GOOD TO KNOW

- Needs your WhatsApp number connected and the approved template for the first reply.
- Off until you switch it on; if the wording changes, it waits until you've read it again.
- Times offered are inside your hours, never on a Sunday. The hub doesn't see your calendar.
- Instagram and Facebook messages need your Employz.ai inbox connected — not set up yet.

What the new features will never do.

These hold on every plan, on top of the rules in the v2.1 guide.

Nothing goes to a customer without your tap.

Follow-ups, Win-Back, referral asks and check-ins open your own WhatsApp with the text typed. Lead Response, on Growth Mentorship, sends only after you've read its exact wording.

Your bank statement stays yours.

Read in the hub, never stored as a file, masked, deleted after 24 hours, owner only. No AI reads it.

Estimates say they are estimates.

GST set-aside is not a GST return; Cash flow is not your accounts. The page says so and sends you to your CA.

The AI never invents prices, discounts or dates.

Follow-ups and Win-Back use only your Knowledge Hub and the offer you typed. Competitor summaries say only what changed.

Public websites only, politely.

Competitor Watch reads at most 5 public pages per check — the Monday check, plus at most one Check now a day — follows robots.txt, and never reads social networks.

Google's content is cleared within 30 days.

Review words, stars and ratings from Google are cleared after 30 days at most, checked every hour — and only come in once the admin sets the Google key.

SET UP ONCE

1. Admin: Admin → Live event → **Move them into Membership**, once, to put the leak finder and follow-ups in the Membership.
2. Owner: switch follow-ups on in Inquiries.
3. Owner: upload a year of sales from Tally or Excel — Customer risk, Getting paid, GST and Win-Back all use it.
4. Hub (when you decide to): set the Google key so reviews and competitors' ratings come in on their own. Until then, owners paste reviews.
5. Growth Mentorship: get the first-reply WhatsApp template approved, then switch Lead Response on.

PLANS

Everything on the Conversion and Data pages, Competitor Watch and Reviews & reputation are in the AI Advantage Membership (₹1,999 a month, 150 AI runs). Win-Back and Content & company research are in the Action Program. Lead Response is in Growth Mentorship.
